-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Applicant's election of Group I, claims 1-10, in the reply filed on 11/30/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 11-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 11/30/05.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in the United Kingdom on 2/15/03. It is noted, however, that applicant has not filed a certified copy of the United Kingdom application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1633

Claims 1-3 and 6-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Orihel, T.C., (J. Parasit. 57(1): 117-121, 1972).

Orihel describes a model for human hookworm infection made by a method of producing non-human primates, chimpanzee and patas monkeys, infected with the human hookworm *Necator americanus* by cutaneous exposure of the primates to infectious hookworm larvae freshly cultured from an infected human 10-14 days earlier. Chimpanzees were infected with 200-1000 larvae. Several chimpanzees were infected with larvae cultured from feces obtained from infected chimpanzees.

Allowable Subject Matter

Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

There is no suggestion in the art of record to infect marmosets with human hookworm,. Orihel *supra* disclosed that while young patas monkeys, old world monkeys, could be patently infected with *N. americanus*, adults could not. This suggests that as a primate is more distantly related to humans, its susceptibility to infection to *N. americanus* would be less, and there is no evidence in the prior art of record that marmosets, new world monkeys, could be infected with *N. americanus*.
